

**To Whom it May Concern**

I confirm that we are aware that **Linton Rogers** is selling a unique book of art to raise money for the Crohn's in Childhood Research Association, a registered UK children's charity.

Crohn's Disease and Ulcerative Colitis (inflammatory bowel disease) are chronic diseases of the intestinal tract, which, as yet, are incurable. The effects of these diseases, especially on children and young adults, can be devastating. All donations are used to maintain and expand the CICRA research programme to develop improved treatments and a better quality of life for these youngsters. Researchers are also looking at the underlying cause which hopefully will lead to a cure or preventative.

Should you have any queries please do not hesitate to contact the CICRA office on 020 8949 6209.

Thank you for your support.

Mrs Margaret Lee MBE  
Chair – Board of Trustees
